Lytec© powered by eMDs is a proven, trusted, and affordable practice management solution designed to simplify the way you run your practice.

What's New in Lytec 2018?

Lytec is already one of the most mature practice management systems on the market. It gets better each year as eMDs adds new layers of functionality and improved usability. Here are just a few notable additions:

Enhanced Eligibility Checking

With the shift in payment responsibility to patients, it's more important than ever to get up to date eligibility benefits information at or before the time of service. eMDs has invested in major upgrades to the eligibility checking system including better automation with more EDI partners.

Coding Edits

New customizable coding edits at the time of charge entry help you generate cleaner claims, reduce rework time, and get paid faster.

Payment Processing Improvements

Remittance posting has been upgraded to allow you to save and suspend posting in the middle of a batch and then pick it up again later. You can print an EOB for a single claim. New filtering options make it easier to find claims that are ready to post and make you more efficient.

Claim Status Checking

Now you can initiate a true claim status check through your clearinghouse and receive an electronic response that updates the status of claims making it even easier to know if you're going to be paid.

Expanded Mobile Functionality

Lytec Mobile now includes a brand new user interface, new levels of customization for your superbills and patient questionnaires, and support for Apple iPhone and iPad devices.

Practice Management You Trust

Lytec's longstanding reputation as one of the most stable, usable practice management systems continues into 2018. Enjoy a host of new features without sacrificing the workflows and customization on which your practice has come to rely.
